

EMC PANEL KIT, FIXED HANDLE

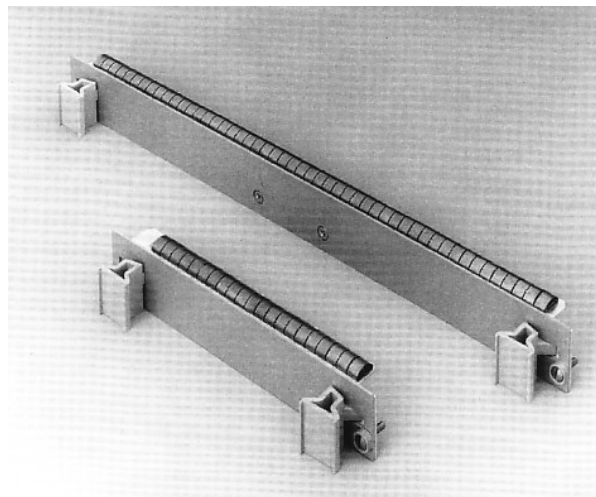

Panel kits for fixing to the PC Board provide an individual front panel for each PC Board, when fitted to the subrack alongside similar style panels they provide a continuous RFI screen across the subrack width and height. The panel comprises a 1,2mm outer aluminium panel which has a satin anodised finish and an inner 1,2mm aluminium which has a conductive Alocrom finish. The inner panel has formed edges along the height and on one side is fitted with a beryllium copper gasket which provides an earth between adjacent panels.

Supplied in kit form, comprising:

Ref	Description	Qty
1	Front Panel outer	1
2	Front Panel inner	1
7	Retention screw	2
8	Handle Gasket & Fixings	1

EMC PANEL KIT, EJECTOR HANDLE

Panel Kits for fixing to the PC Board provide an additional front panel for each PC Board, when fitted alongside similar style panels they provide a continuous RFI screen across the height of the subrack. Integral ejector handles are included to assist the Panel and PC Board withdrawal dis-engaging the connectors and overcoming the friction caused through EMC gaskets and the adjacent panels.

Supplied in kit form, comprising:

Ref	Description	Qty
1	Front Panel outer	1
2	Front Panel inner	1
7	Retention screw	2
8	Ejector Handle Gasket & Fixings	2
